#### **COURSE DESCRIPTION:**

This course supports the mission statement of Parker University by helping to create leaders who promote Chiropractic wellness through high standards of education, research and service. This course is designed to give the student a sound educational foundation in the development of a working diagnosis and differential diagnosis through the presentation and evaluation of cases and case studies.

The course requires that student to research outside sources to gain insight and development of critical thinking skills essential for patient management. The course will introduce a systematic approach to the development of a differential diagnosis using sound reasoning skills that have been gained over the course of the student's studies. In addition algorithms will be introduced as an aid. The understandings of the concepts presented are absolutely essential to become a successful Chiropractor. Emphasis will be placed on common conditions the Chiropractor will encounter during practice.

#### **LEARNING OBJECTIVES:**

## **Learning Outcomes:**

At the completion of this course, the student should:

- 1. Be able to integrate facts and concepts of basic clinical findings of commonly occurring conditions seen by the Chiropractor.
- 2. Be able to recognize the process of gathering data, interpreting data and arriving at a succinct differential or working diagnosis.
- 3. Be able to discuss diagnostic procedures and their usefulness based on presenting history and/or presumed etiology.
- 4. Be able to identify "red flags" of some uncommon presentations of viscerosomatic conditions that present similar to musculoskeletal conditions seen often by the Chiropractor.
- 5. Develop clinical decision making skills.

## **GENERAL APPROACH TO TEACHING:**

Differential Diagnosis class is designed to be an interactive class. I welcome your questions and encourage classroom discussion. Students are encouraged to participate in open discussion for the purpose of clarification.

#### ESTIMATE OF STUDENT WORK LOAD:

A student should plan to spend a minimum of 3 hours per week on the materials presented in this course. Some may spend considerably more and some may spend less. You should consider initially working alone and then in a study group so concepts can be discussed and elaborated upon.

### **PREREQUISITES:**

Advanced Clinical Diagnosis

## **REQUIRED TEXTBOOKS:**

1. Differential Diagnosis and Management for the Chiropractic (protocols and algorithms). Author-Thomas A. Souza

#### **RECOMMENDED ADDITIONAL TEXTBOOKS:**

1. Neuroanatomy through Clinical Cases. Author – Hal Blumenfeld

NOTE\* If there is a disagreement between the lecture material and the texts, consider the lecture material preeminent for testing purposes.

#### SUPPLIES:

Scantron Sheets and #2 pencils for taking exams Students will need a good clean eraser because **No Credit** is given for incomplete eraser mistakes made on the scantron sheet once they are graded.

#### **EVALUATION AND GRADING POLICY:**

Evaluation is an integral part of the educational process and is used as an educational tool to help students identify problem areas, to recognize and reward achievement, and to identify students who are unable to meet the rigors of the curriculum. Final course grades and their interpretation are listed below:

#### **DISCLAIMER**

The lecture outlines contained in the lecture booklet are NOT intended to represent the entire content of the course. A lecture outline is intended to be a guide to the lecture. The responsibility of the instructor is to follow the outline, expand the concepts and give explanation and illustrations to clarify content. The role of the student is to attend lecture and take notes over material presented by the lecturer that explains and illustrates the material listed in the outline. It is also the responsibility of the student to question the instructor if explanations and illustrations are not clearly presented or understood.

The instructors take no responsibility for the accuracy or completeness of old notes, quiz questions or exam questions that students may purchase, acquire from off of the internet or be given by previous students.
