

## **Clinical Placements / Covid Vaccine**

An increasing number of our healthcare partners and clinical sites hosting students for academic activities such as observations, demonstrations, and clinical experiences are requiring students to be fully vaccinated.

As an expressed policy of many of the clinical sites, students must be fully vaccinated prior to the start date of their clinical experiences. Therefore, unvaccinated students are at risk of a significant delay or cancellation of their clinical placement, potentially delaying their graduation date. If the clinical facility institutes a mandatory vaccination policy while the student is in a clinical experience, the student could be required to leave that site until fully vaccinated.

Parker University continues to support personal choice, however failing to vaccinate could result in a loss of opportunities to participate in required program activities and clinical experiences, and thus could result in delays in completing your program.
