

## **Covid-19 Disclosure Form**

After the COVID-19 pandemic, clinical sites hosting Diagnostic Cardiac Sonography (DCS) students for academic activities such as observations, demonstrations, and clinical rotations are requiring students to be fully vaccinated with two COVID-19 vaccine doses.

An expressed policy of many clinical sites indicates all students must be fully vaccinated before their clinical rotation start date.

Therefore, unvaccinated students are at risk of a significant delay or cancellation of their clinical placement(s). A delay or cancellation in any clinical experience(s) could result in financial implications and delay students' graduation date.

Parker University continues to support personal responsibility and choice, however failing to obtain the COVID vaccination/booster(s) could result in a loss of opportunities to participate in required program activities and clinical rotations, and thus could result in delays in completing your program.
