

# COVID Vaccine and COVID Booster(s) Acknowledgement Summary

## Clinical placements and the COVID Vaccine/COVID Booster(s) requirements

Recently, an increasing number of our healthcare partners and clinical sites hosting students for academic activities such as observations, demonstrations, field trips, and clinical experiences are requiring students to be fully vaccinated and boosted.

An expressed policy of many clinical sites indicates all students must be fully vaccinated and boosted before the start date of their clinical experiences. Therefore, unvaccinated students are at risk of a significant delay or cancellation of their clinical placement(s). A delay or cancellation in any clinical experience(s) could result in financial implications and delay students' graduation date. If the clinical facility institutes a mandatory vaccination (inclusive of boosters) policy while the student is in a clinical experience, the student could be required to leave that site until fully vaccinated and boosted.

Parker University continues to support personal responsibility and choice, however failing to obtain the COVID vaccination/booster(s) could result in a loss of opportunities to participate in required program activities and clinical experiences, and thus could result in delays in completing your program.

### Student's Acknowledgement:

My signature acknowledges that I have been informed about our healthcare partners and clinical sites' COVID vaccine and booster(s) requirements. I understand that I can decide not to obtain the COVID vaccine and booster(s) now or in the future, but I am responsible for decisions about academic/financial aid consequences resulting from my decision.

I have read, acknowledge, and agree:
