

A Message from the Director of Security

I firmly believe in the idea that the Security Department exists to serve the needs of our staff, faculty, students and visitors who occupy our wonderful campus daily.

The Security Department works diligently to serve those who work, study and frequent areas within our Campus. I remain extremely proud of the professional and dedicated manner in which these services are provided and the individuals who provide them. We are committed to promoting a safe and enjoyable environment.

Our job as the Security Department is to empower staff, students and faculty with the knowledge to effectively respond to an emergency or catastrophic event with a sense of confidence and security. We are dedicated to taking a proactive approach to educating the Campus Community about the valuable role University security officer's play that goes far beyond the realms of enforcing parking rules, policy and procedures. I am well attuned to crime trends and statistics and I believe we cannot improve if we are not measuring and assessing our performance. Together we will continue to enhance the quality of life for those who work and visit our great campus.

David Butler

Director of Security
